

INDEX:	page
Foreword	i
Chapter 1.	
a. The collision	1
b. Separating roads	3
Chapter 2. Possibilities and defects of different metaphysical methods of research (on the basis of my own experiences)	
a. Different experiences	21
b. Meeting with phenomenology and anthroposophers	31
Chapter 3. The own road of development	43
Chapter 4. Another approach of science	
a. Criticism upon present-day science in short	60
b. Perspectives for the development of a new practice of science	65
c. Star science, the arch mother of the sciences	73
Chapter 5. Perspectives for a new practice of science out of renewed star science	
a. Headlines for a new star science	
1. Introduction	83
2. Effects of stars and planets upon man and the earth	86
b. Outworkings of a renewed star science	
1. The twelve Zodiacal images as archetypal concepts and their gestures	94
2. The seven planets as specific soul attitudes	132
3. The twelve rhythmical form gestures that give rise to shapes	147
4. The workings of the higher worlds in the physical	152
Chapter 6. The sciences, viewed out of man as a reflection of the cosmos	
a.1. Classification of the sciences	
according to the human soul	156
2. Theogony on the base of social organics	160
3. Recognition of the Angels and other spiritual beings	165
4. Angel hierarchies and their effects upon man and the Earth	169
5. Spheres of working of formative forces, planets and angels	
The envelops of the earth and the layers within	
I. Beings in elements and earth realms	188
II. Life spheres of planets, earth envelopes and inner division	189

III. Natural beings from high to low	191
b. Outworkings to science regions out of the new star science	
1. α -sciences	207
1. Philosophy, love for wisdom	208
2. Musicology	219
Possible outworkings	227
3. From linguistics to Word using	
I. Introduction	231
II. Grammar	233
III. Words and word sounds	234
IV. Literature	235
4. Mathematics	
I. Introduction	237
II. Outworking to division	239
III. Future	243
2. γ -sciences	
1. Psychology, soul science	
I. Introduction	245
II. The soul and its functions	247
III. Future perspectives	255
2. Sociology	256
3. Pedagogy	
I. Introduction	268
II. Basic principles of pedagogy	271
4. From describing to acting in history	
I. Introduction	287
II. Group beings and individuals in the time process	289
III. Methods of historical research	
1. Personal relation to different times	292
2. Investigations within groups	294
3. Long lasting research to a location	295
5. Right	
I. Introduction	296
II. Law and the ethical individualism	298
III. Elements for the reformulation of the juridical	301
6. Social geography/cultural anthropology	307
7. Economy	
I. Introduction. The economy as being objective wishing- and thrive life	308
II. The sevenfoldness as possible structure for reorganization of the economical-social life	314

3. β -sciences	
A. In general	321
B.1. Natural science, physics	
I. In general	327
II. Reformulation of physics and its divisions	331
III. Physical subdivisions and their appliance possibilities	340
IV. Some outworkings	
Optics	344
Fields	346
Mechanics/dynamics	352
Thermodynamics, research of energy levels	353
B.2. Chemistry	
I. Introduction	353
II. Astrosophical chemistry	356
B.3. Astronomy	365
B.4. Biology, teachings of the living	
I. Introduction	367
II. Geology out of the life world	380
III. Special biology	391
Time scheme of the Earth development	393
IV. Plant kingdom	396
V. Animal kingdom	400
VI. Microbiology	408
VII. Anthropology	411
Zodiacal star images and the human body	420
Organ processes out of the planet movements	423
B.5. Medicine art	
I. State of affairs	430
II. Reformulation of healing art as moral technique	431
III. Therapeutic directions and possibilities	439
Chapter 7. Possibilities for the formation of a renewed university	
a. Introduction	440
b. A threefold university within society	451
c. Applications in the social life	458
Notes and book references	460
Index	502
